ANNEXURE - IV**MANAGEMENT DISCUSSION AND ANALYSIS:****INDUSTRY STRUCTURE AND DEVELOPMENTS :****Global Economic Outlook :**

The World economic growth strengthened in 2017 to 3.8% and is expected to continue strong growth in Asia and Europe. The Global growth is expected to touch up to 3.9% in 2018 and 2019 supported by strong momentum, favourable market sentiment, accommodative financial conditions, and the domestic and international repercussions of expansionary fiscal policy in the United States. Among emerging market and developing economies, growth prospects are becoming more uneven, amid rising oil prices, higher yields in the United States, escalating trade tensions, and market pressures on the currencies of some economies with weaker fundamentals. Growth projections have been revised down for Argentina, Brazil, and India, while the outlook for some oil exporters has strengthened.

Indian Economy

As per the advance estimates of national income released by the Central Statistics Office in February 2018, real Gross Domestic Product (GDP) at constant prices is estimated to grow at 6.6% for 2017-18. The Indian economy achieved an impressive growth rate of 7.2%, a five-quarter high during the third quarter (Oct-Dec) of FY18 as opposed to 6.5% in the second quarter. India also regained its tag of the fastest growing major economy in the third quarter. Gross Value Added (GVA) at basic constant prices for 2017-18 is expected to be around 6.4% as against 7.1% in 2016-17.

The Industrial growth also recovered with the Index of Industrial production (IIP) registering an impressive growth rate of 7.5% in January 2018 as compared to 2.4% in January 2017. The cumulative growth for the period April-Jan 2017-18 stood at 3.7% in contrast to 5.1% growth registered during April-Jan 2016-17.

Indian exports exhibited cumulative value for the period April-Feb 2017-18 at US\$ 273 billion expanded by around 11% over the same period during 2016-17.

Indian Economy out look

The year 2017 was marked by a number of key structural changes for sustainable growth in the future. The growth in the first half of the year suffered despite global tailwinds. However, the weakness witnessed at the beginning of 2017 seems to have bottomed out as 2018 set in. Currently, the economy seems to be on the path to recovery, with indicators of industrial production, stock market index, auto sales and exports having shown some uptick. It is expected that the India's economic outlook remains promising for FY17-18 and is expected to strengthen further in FY18-19. The biggest challenges for 2018 are as to how the economy can maintain its recovery in the face of increasing inflationary pressures, coupled with a higher fiscal deficit as well as an increasing debt burden. The key to this conundrum lies in the revival of consumer demand and private investment.

The Government of India introduced Goods and Services Tax (GST) on July 1, 2017 all over India and all states approved their State GST by replacing existing indirect taxes like Excise duty, Service Tax, VAT, Luxury Tax, Entertainment Tax etc. GST had been introduced to reduce the tax burden on both companies and consumers. GST integrated most of the taxes into one

single tax, where the consumers are benefited. This method provides Input Tax credit paid on the purchase of goods and services, which can be offset with the tax to be paid on the supply of goods and services. As a result, this reduces the overall cost, with the end customer paying less. Impact of GST on Indian Economy is varied such as **Increase in competitiveness, Simple Tax Structure, Economic Union of India, Uniform Tax Regime, Greater Tax Revenues etc.**

Global Sugar scenario

Sugar is one of the world's major agro-based industries and is also one of the most actively traded soft commodities on the exchanges. Brazil, India, the EU, China and Thailand rank amongst the top global producers of sugar. Around 80% of the sugar is produced from sugarcane while the balance is from sugar beet. Brazil and India are the largest sugar producers from sugarcane and EU and U.S are the major sugar producers from beet. India, the EU, China, Brazil and U.S are the major sugar consuming countries.

Global trends in sugar

The global sugar production for the sugar year 2017-18 is up by 11.075 million metric tonnes (raw value) to 179.448 million following highest production in Brazil, India, European Union, China and Thailand. It is estimated that the surplus of sugar for the year 2017-18, is bigger than the deficit for the years 2015-16 and 2016-17 put together. Due to the global surplus of Sugar Stock, the global prices have fallen down from US\$ 465.10 to US\$ 354.10 per tonne decline by 23.9%.

Domestic Scenario

Sugar Production and Consumption:

The domestic sugar production increased by 58.54% to 321.83 Lakh MT during Sugar Year 2018 from 203.00 Lakh MT in Sugar Year 2017, mainly driven by an expected recovery in sugar production from the key sugar producing states of Maharashtra, Uttar Pradesh and Karnataka. The Sugar mills in Maharashtra have produced 106.50 Lakh MT, mills in UP produced 112 Lakh MT and in Karnataka, mills produced 36.30 Lakh MT and other states produced 45.65 Lakh MT.

The domestic sugar consumption increased to around 255.00 Lakh MT for sugar year 2018 from 245.00 Lakh MT in sugar season 2017. An opening stock of 40 Lakh tonnes coupled with Sugar Production of 321.83 Lakh MT, it is likely to result in an overall sugar availability of 362.00 lakh MT. This is expected to meet the domestic consumption of around 255 Lakh MT till October 2018 resulting in closing stocks of around 117.00 lakh MT as on October, 2018.

The domestic Sugar prices have fell down from the beginning of the Sugar season from Rs36.00 per Kg to Rs 28.00 till March 2018 and further fallen down to Rs 26.50 per Kg; that is fall of 23%. During April and May, the prices further fell to Rs 26.50 per Kg.

Price for Sugar Cane:

The cane Fair and Remunerative Price (FRP) for the current sugar season 2018-19 have been increased. The Central Government has fixed (FRP) at Rs255/quintal against Rs.230/quintal of SY 2017-18, with a premium of 2.68% for every 0.1% increase in above 9.5% level of Recovery.

Indian Biofuel sector overview:

Sugar Mills produce ethanol from molasses which is a by-product of Sugar manufacture. The Government of India is keen on encouraging environmental friendly vehicles and imposed compulsory blending of Ethanol. Ethanol supply to Oil Marketing Companies for blending is expected to rise to 71% in the season 2017-18.

Policies by the Central Government, 2017-18

- In July 2017, the import duty on sugar was hiked from 40% to 50%.
- In August 2017, the Central Government imposed a stock holding limit on Sugar that did not allow any sugar manufacturer to hold stocks in > 21% and reduced the same to > 8% for the month of September and October respectively.
- In December 2017, this stock holding limit was withdrawn to ensure adequate availability of sugar across the country, thereby increasing demand and propping up sugar prices.
- In February 2018, the import duty on Sugar was increased to 100% and imposed limit on sugar and imposed to hold stock of 83% for February 2018 and 86% for March 2018.
- In March 2018, the Central Government allowed the export of 20 lakh tonnes of Sugar by September 2018, under the minimum indicative export quota.
- In March 2018, the Central Government allowed the export of Sugar till September, 2018 under the duty free import authorisation scheme.
- In March 2018, the Central Government scrapped the 20% export duty on raw, white or refined sugar to encourage exports.
- In June 2018, Central Government announced Minimum selling price (MSP) of Rs 29/- per Kg on Sugar. Sugar Mills cannot sell below MSP.
- The Central government announced compulsory blending of Ethanol upto 10% as per BIS specification by OMC's

OPPORTUNITIES AND THREATS:

Opportunities:

The long term outlook for sugar remains positive and promising on account of:

- The above mentioned Government policies will enable the sugar industry to get out of financial crisis to get more Revenue year on Year.
- Mandatory blending of Ethanol with petrol will boost the revenue of sugar mills and profitability.
- Growing energy consumption in India allowing the sugar industry to play a vital role.
- Environmental friendly power generated by Cogeneration Units equipped with high-pressure boilers and turbines that intelligently use the fuel to get optimum energy output.
- Expected flow of funds from Trading of Renewable Energy Certificate (REC).
- More emphasize on Bio-composting process and consequent efforts to convert organic and inorganic matter into bio-manure to ensure zero discharge from the distillery combining with press mud.
- Growing demand for bio manure, which works as the perfect soil conditioner. Bio manure made from distillery and organic matter does not allow leaching of chemicals and hence can offer a solution to the problem of depletion of soil productivity.

Threats:

Sugar industry is at present confronted by the following threats:

- Dearth in availability of farm labour for harvesting, transportation, loading and unloading of sugar cane and sugar.
- Cyclical nature of industry and local climatic conditions over the crop affecting both the quantity and quality of cane available.

- Short crushing season.
- Shrinkage of sugarcane area under cultivation due to growing urbanisation and availability of many alternate cash crops.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk.

The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect

Twenty Third Annual Report

the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Basis for Qualified opinion

According to the information and explanations given to us and based on our audit, material weaknesses have been identified as at March 31, 2018 relating to inadequate internal financial controls over financial reporting in respect of certain reconciliations between various accounting systems and period-end adjustments as fully described in Note 28.19 to the financial statements, and Management's assessment of estimating potential liability relating to a disputed matter as described in Note 28.16 to the financial statements. A 'material weakness' is a deficiency, or a combination of deficiencies, in internal financial control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, except for the possible effects of the material weaknesses described in Basis for Qualified Opinion paragraph above on the achievement of the objectives of the control criteria, the Company has maintained, in all material respects, adequate internal financial controls over financial reporting and such internal financial controls over financial reporting were operating effectively as of March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. We have considered the material weaknesses identified and reported above in determining the nature, timing, and extent of audit tests applied in our audit of the financial statements of the Company for the year ended March 31, 2018, and these material weaknesses did not affect our opinion on the said financial statements of the Company, except in respect of the qualification relating to the Management's assessment of estimating potential liability relating to a disputed matter, in respect of which, we have issued a qualified opinion on the financial statements of the Company.

1.2. Basis of Preparation and Presentation of Financial Statements

The Financial statements are prepared on accrual basis following the historical cost convention except in case of certain financial instruments which are measured at fair values. The Balance Sheet and the Statement of Profit and Loss are prepared and presented in the format prescribed under Schedule III to the Act. The Statement of Cash Flows has been prepared and presented as per the requirements of Indian Accounting Standard (Ind AS) - 7 on "Statement of Cash Flows". The disclosure requirements with respect to items in the Balance Sheet and Statement of Profit and Loss, as prescribed in the Schedule III to the Act, are presented by way of notes forming part of the financial statements along with other notes required to be disclosed under the notified Ind AS and the Listing Agreement. Further, the guidance notes/announcements issued by the Institute of Chartered Accountants of India (ICAI) are also considered, wherever applicable except to the extent where compliance with other statutory promulgations viz. Fair value measurements under Ind AS are categorized as below based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Actual results may differ from these estimates. The Company evaluates these estimations and assumptions on a continuous basis based on the historical experience and other factors including expectation of future events believed to be reasonable. Examples of such estimates include the useful lives of tangible and intangible fixed assets, allowance for doubtful debts/ advances, future obligations in respect of retirement benefit plans, estimation of costs as a proportion to the total costs, etc., Difference, if any, between the actual results and estimates is recognized in the period in which the results are known/materialized. Changes in estimates are reflected in the financial statements in the period in which changes are made and if material, are disclosed in the Notes to Account.

1.4 Inventories

- (a) Raw materials, Stock-in-trade, Stores and Spares and Consumables are valued at lower of cost or net realizable value. - Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments on reasonable basis have been included under “unallocated revenue / expenses / assets / liabilities”.

1.14 Earnings Per Share

The Company presents basic and diluted earnings per share (“EPS”) data for its equity shares. The basic earnings per share (“EPS”) are calculated by dividing the profit / (loss) after tax by the weighted average number of Equity Shares outstanding. Diluted earnings per share is computed by dividing net profits for the year, adjusted for the effects of dilutive potential equity shares, attributable to the Equity Shareholders by the weighted average number of the equity shares and dilutive potential equity shares outstanding during the year except where the results are anti-dilutive. Dilutive potential equity shares are deemed to be converted as of the beginning of the year, unless they have been issued at a later date.

1.15 Taxes on Income

(a) Current Tax

Provision for Current tax is made based on the liability computed in accordance with the relevant tax rates and provisions of Income Tax Act, 1961 as at the balance sheet date and any adjustments to taxes in respect of the previous years, penalties if any related to income tax are included in the current tax expense.

(b) Minimum Alternate Tax

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax. Accordingly, MAT is recognised as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

(c) Deferred Tax

Deferred Tax is the tax expected to be payable or recoverable on differences between the carrying amount of the assets and liabilities for financial reporting purpose and the corresponding tax bases used in computation of taxable profit. Deferred tax assets are recognized and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such Deferred Tax Assets can be realized.

Current and deferred tax is recognized in profit or loss, except to the extent that it related to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

1.16 Impairment of Non-Financial Assets

As at each Balance Sheet date, the Company assesses whether there is an indication that a non-financial asset may be impaired and also whether there is an indication of reversal of impairment loss recognized in the previous periods. If any indication exists, or when annual impairment testing for an asset is required, the Company determines the recoverable amount and impairment loss is recognised when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is determined:

- In case of an individual asset, at the higher of the Assets' fair value less cost to sell and value in use; and
- In case of cash generating unit (a group of assets that generates identified, independent cash flows), at the higher of cash generating unit's fair value less cost to sell and value in use.
- In assessing Value in Use, the estimated future cash flows are discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specified with the asset. In determining fair value less cost to sell, recent market transactions are taken into account. If no such transaction can be identified, an appropriate valuation model is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss, except for properties previously revalued with the revaluation taken to Other Comprehensive Income (OCI). For such properties, the impairment is recognised in OCI up to the amount of any previous revaluation. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, then the previously recognized impairment loss is reversed through the Statement of Profit and Loss.

1.17 Financial Instruments

Financial Assets and Financial Liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial Assets and Financial Liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of Financial Assets and Financial Liabilities (other than Financial Assets and Financial Liabilities at fair value through profit or loss) are added to or deducted from the fair value of the Financial Assets or Financial Liabilities, as appropriate, on initial

recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

1.18 Financial Assets

Financial Asset is any Asset that is -

- (a) Cash
- (b) Equity Instrument of another Entity,
- (c) Contractual right to -
 - i. receive Cash / another Financial Asset from another Entity, or
 - ii. exchange Financial Assets or Financial Liabilities with another Entity under conditions that are potentially favourable to the Entity.
- (d) a contract that will or may be settled in the entity's own equity instruments and is:
 - i. a non-derivative for which the entity is or may be obliged to receive a variable number of the entity's own equity instruments; or
 - ii. a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments.

Impairment of Financial Assets

In accordance with Ind AS 109, the Company applies the expected credit loss ("ECL") model for measurement and recognition of impairment loss on financial assets and credit risk exposures. The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables. Simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECL at each reporting date, right from its initial recognition. For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on 12-month ECL. ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR. Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date. ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Statement of Profit and Loss.

Financial Liabilities

Financial liabilities are recognized at fair value net of transaction costs and are subsequently held at amortized cost using the effective interest rate method. Financial liabilities carried at fair value through profit and loss are measured at fair value with changes in fair value recognized in the profit and loss account. Interest bearing bank loans are initially measured at fair value and subsequently measured at amortized cost using the effective interest rate method.

For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate the fair value due to the short maturity of these instruments.

De-recognition of Financial Instruments

A Financial Asset is derecognized when the rights to receive cash flows from the asset have expired or the company has transferred substantially all the risks and rewards or the right to receive the cash flows under a contractual arrangement or has transferred the asset.

A Financial Liability is derecognized when the obligation under the liability is discharged or cancelled or expires. In the case where the existing liability is replaced by another liability either from the same lender or otherwise such an exchange is treated as de-recognition of the original liability and recognition of a new liability. Any change in the carrying amount of a liability is recognized in the Statement of Profit and Loss.

1.19 Provisions and Contingencies

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources to settle the obligation in respect of which reliable estimate can be made as on the balance sheet date. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

Contingent Liabilities are present obligations arising from a past event, when it is not probable / probability is remote that an outflow of resources will be required to settle the obligation and they are not recognized but are disclosed in the notes.

Contingent Assets are neither recognized nor disclosed in the financial statements except where it has become virtually certain that an inflow of economic benefit will arise, the asset and the related income are recognized in financial statements of the period in which the change occurs. Provisions for Contingent Liabilities and Contingent Assets are reviewed at the end of Balance Sheet date.

1.20 Operating cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

1.21 Exceptional items

Items of income and expenditure within profit and loss from ordinary activities are of such size, nature or incidence that their disclosure is relevant to explain the performance of the enterprise for the period, the nature and amount of such items are disclosed separately as Exceptional Items.

1.22 Commitments

- (a) Commitments are future liabilities for contractual expenditure.
- (b) Commitments are classified and disclosed as follows:

- Estimated amount of contracts remaining to be executed on capital account and not provided for;
 - Uncalled liability on shares and other investments partly paid;
 - Funding related commitment to subsidiary, associate and joint venture companies and
 - Other non-cancellable commitments, if any, to the extent they are considered material and relevant in the opinion of management.
- (c) Other commitments related to sales/procurements made in the normal course of business are not disclosed to avoid excessive details.

1.23 Recent Indian Accounting Standards (Ind AS)

Ministry of Corporate Affairs ("MCA") through Companies (Indian Accounting Standards) Amendment Rules, 2018 has notified the following new and amendments to Ind ASs which the Company has not applied as they are effective for annual periods beginning on or after April 1, 2018:

a) Ind AS 115 – Revenue from Contracts with Customers:

As per the amended rules, Ind AS 115 "Revenue from contracts with customers" supersedes Ind AS 11, "Construction contracts" and Ind AS 18, "Revenue" and is applicable for all accounting periods commencing on or after 1 April 2018.

Ind AS 115 introduces a new framework of five step model for the analysis of revenue transactions.

Step 1: Identify the contract(s) with a customer

Step 2: Identify the performance obligation in contract

Step 3: Determine the transaction price

Step 4: Allocate the transaction price to the performance obligations in the contract

Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation

The model specifies that revenue should be recognised when (or as) an entity transfer control of goods or services to a customer at the amount to which the entity expects to be entitled. Further the new standard requires enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers. The new revenue standard is applicable to the Company from 1 April 2018.

The standard permits two possible methods of transition:

- i. Retrospective approach - Under this approach the standard will be applied retrospectively to each prior reporting period presented in accordance with Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors
- ii. Retrospectively with cumulative effect of initially applying the standard recognized at the date of initial application (cumulative catch - up approach)

The Company is evaluating the requirement of the amendment and the impact on the financial statements. The effect on adoption of Ind AS 115 is expected to be insignificant.

b) Ind AS 21 – The Effect of Changes in Foreign Exchange Rates

Appendix B to Ind AS 21, Foreign currency transactions and advance consideration: On 28 March 2018, Ministry of Corporate Affairs (“MCA”) has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency.

The amendment will come into force from 1 April 2018. The Company is evaluating the requirement of the amendment and the impact on the financial statements. The effect on adoption of Ind AS 21 is expected to be insignificant.

28.16 The Hon'ble High Court of Judicature at Hyderabad for the State of Telangana and the State of Andhra Pradesh dismissed the Company's writ petition (along with the other petitions on the same matter filed by other companies) vide its common order dated May 19, 2016 ('the Order') in which it upheld the validity of levy of Electricity Duty @ 25 paise per unit by the State Government on consumption of electricity by captive generating units relating to earlier years. During the previous year, the Company filed a Special Leave Petition (SLP) in the Hon'ble Supreme Court which dismissed the SLP vide order dated September 27, 2016 on the grounds that these matters were pending before the Board for Industrial and Financial Reconstruction (BIFR), and unless payments were being made by the petitioners as directed in its interim orders @ 15 paise per unit. The Hon'ble Supreme Court also granted liberty to the petitioners to revive the petitions after the decision is given by the BIFR. Currently, the case filed before BIFR stands abated and the Company has not initiated any proceedings before the NCLT. The management is of the view that as the case filed before BIFR stands abated and no demand notices were received thereafter for the payment, the Company has treated the estimated duty amount aggregating ₹ 284 lakhs as a Contingent Liability and no provision has been made in respect of the same. In the event of an unfavourable verdict/outcome in this matter, the Management based on the Supreme Court's interim orders and considering the inherent uncertainty in predicting the final outcome of the above litigation estimates the impact of the potential liability to be ₹170 lakhs. In view of the above, the auditors have made a qualification in their Audit Report about their inability to comment on the ultimate outcome of this matter and the consequential impact, if any, on these financials statement.

28.17 Over the last few years, the Company has been incurring losses and as at 31st March, 2018, the accumulated losses amounting to ₹11,588.46 Lakhs (31st March, 2017 ₹12,804.58 Lakhs) have completely eroded the net worth and its current liabilities exceeded the current assets as on that date. The financial statements have been prepared on a going concern basis, based on a Comfort letter provided by the promoters for continued support to the Company to meet its financial obligations, in order to enable the Company to continue its operations in the foreseeable future.

28.18 Cheques on Hand represent cheques received by the Company, pending to be presented to banks for deposit/clearance as at the balance sheet date.

28.19 Financial Reporting Process. The Management conducted an assessment of the effectiveness of the internal control over financial reporting using the criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. Based on this assessment, Management identified deficiencies in the internal control over financial reporting, that constitute material weaknesses, in respect of certain reconciliations between various accounting systems and the period-end

Twenty Third Annual Report

adjustments. The Company uses various subsystems, the output from which, is being used for accounting in the financial package maintained by the Company. Consequent to certain deficiencies in IT General and Application controls in the software platforms used for financial reporting, there were differences between sub-systems / sub- ledgers with the general ledger, which have been manually reconciled by the Company. Further, Management review controls over entity's financial reporting were ineffective as evidenced by recording of certain period-end adjustment entries. Whilst all necessary adjustment entries were passed in the books of account for the year ended 31st March 2018, the related material weakness in internal control was remediated after the year-end.

28.20 Previous year's figures have been regrouped / reclassified wherever necessary to correspond with the current year's classification / disclosure.
