MANAGEMENT DISCUSSION AND ANALYSIS

Industrial Structure and Development:

Currently the sugar industry in India is covered by public, co-operative and private sector companies. Co-operative Sector accounts for nearly 39% in terms of number of factories, installed capacity and production. India is the largest consumer and the second largest producer of sugar in the world. There are over 488 sugar factories of various capacities operated this year. The ownership of sugar industry is a combination of public, private and co-operative sectors. Sugar is produced in almost all the major Indian States. Maharashtra and U.P. contribute 70% of the country's total production. Tamilnadu, Karnataka, Andhra Pradesh, Bihar and Gujarat are the other major sugar producing States. The sugar prices are very sensitive from the common man's point of view.

The sugar production in the country during the year will be around 203 Lakh tonne compared to 251 Lakh tonne in the previous year. The sugar production is likely to improve during the year 2017-18 due to good monsoons and increase in plantation area.

Opportunities and Threats:

Opportunities:

The long term outlook for sugar looks to be promising on account of:

- Liberalisation and decontrol measures taken by the Government
- Environmental friendly power generation from co-generation units equipped with high pressure boiler and turbines is getting maximum energy output.
- Bio-composting processes and conversion of organic and in-organic matter into bio-manure to ensure zero discharge from distillery.

- The Government of India is promoting Ethanol blending up to 10% and the oil Companies have issued tenders for Ethanol supply and have also revised the ethanol prices.
- Increase in the Domestic Prices of Sugar.
- The interest rates have started coming down.

Threats:

The sugar industry presently is coming across the following threats:

- Shortage in availability of farm labour for harvesting and transportation, loading and unloading of sugarcane.
- Continuous increase in FRP for the last 3 to 4 years has resulted in increase in cane procurement price..
- Increase in number of sugar factories in surrounding area and also increase in their crushing capacity.

“Annexure - B” to the Independant Auditors' Report

(Referred to in paragraph 2(f) of our ‘Report on Other Legal & Regulatory Requirement’ of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of The Ugar Sugar Works Limited (“the Company”) as of 31st March 2017 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (‘ICAI’). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide

reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion Paragraph

In our opinion, the Company has, in all material respects, an adequate internal financial control system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31-03-2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.

iii. Impairment of Assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If an indication exists, the Company estimates the asset's recoverable amount. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the company estimates the asset's recoverable amount. A previously recognised impairment loss is changed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised.
