

INDICATIVE REVISED ALLOCATIONS OF SCJ & BHM
(QUANTITY BIDDING FOR SUPPLY OF AROUND 825 CRORE LITRES OF DENATURED ANHYDROUS ETHANOL AT OMC LOCATIONS FOR ESY 23-24
TENDER REF. NO.1000410082 (C-1), E TENDER No. – 13795)

GENERAL PRINCIPLES

Each vendor needs to ensure that they supply SCJ and BHM Ethanol as per the revised allocation limits (OMC wise) for Q1&Q2 as tabulated below. The revised allocated quantities of SCJ and BHM for Q3&Q4 have also been tabulated below (aggregated for OMCs).
 All distilleries should endeavour to make and supply maximum ethanol from C-Heavy molasses to OMCs. Existing allocation of SCJ and BHM can be converted to CHM.
 No further feedstock conversion to SCJ & BHM will be allowed from other feedstocks.
 OMCs reserve the right to further revise the allocated quantities as per requirement / directives from Ministry.

SCJ SUPPLY PRINCIPLES

OMC wise - Vendor wise revised allocation of SCJ for Q1&Q2 has been tabulated below. Vendor should not exceed the Total SCJ quantity supplied (as per the revised allocation) to each OMC individually. **(A)**
 In case a vendor has a balance quantity of SCJ for supply in Q1&Q2 to a particular OMC, they can either supply that quantity as SCJ or convert it to BHM keeping the overall sugar diversion intact i.e. BHM Qty. = (SCJ Qty. x 1.875)
 In case a vendor has already exceeded the supply of his revised SCJ Allocated Qty. of Q1+Q2 for a particular OMC, no further supplies of SCJ to be undertaken and the differential sugar diversion on account of this excess supply will be deducted from their BHM allocation of Q1+Q2 of that OMC first and if required from Q3/Q4 allocated quantities of SCJ & BHM.
 Vendor wise quantity of SCJ Ethanol that has been converted and to be supplied from BHM for Q1 & Q2 has also been mentioned. **(B)**
 For Q3 & Q4 (since we have not published the OMC wise allocations), the vendor wise revised SCJ Allocated Quantity has been mentioned and will be used for arriving at OMC wise - location wise allocations **(D)**. Vendor wise quantity of SCJ Ethanol that has been converted and to be supplied from BHM for Q3 & Q4 has also been mentioned **(E)**

BHM SUPPLY PRINCIPLES

OMC wise - Vendor wise revised allocation of BHM for Q1&Q2 has been tabulated below. Vendor should not exceed the Total BHM quantity supplied (as per the revised allocation) to each OMC individually. **(C)**
 In case a vendor has already exceeded the supply of his revised BHM Allocated Qty. of Q1+Q2 for a particular OMC, no further supplies of BHM to be undertaken and the differential sugar diversion on account of this excess supply will be deducted from their SCJ allocation of Q1+Q2 of that OMC first and if required from Q3/Q4 allocated quantities of BHM & SCJ.
 No Diversion of BHM Revised Allocated Quantities to SCJ will be permitted.
 For Q3 & Q4 (since we have not published the OMC wise allocations), the vendor wise revised BHM Allocated Quantity has been mentioned and will be used for arriving at OMC wise - location wise allocations. **(F)**
